Google Tips:

- you can string together words without using **and**
- you can add "quotation marks" to specify a whole phrase
- you can string together synonyms using **OR**

1. Search in Google - civil war - how many results? ____________________________

2. Search in Google - "civil war" - how many results? ____________________________

3. Add into your current search more specifics - "Andersonville" - results? ________________

4. Search in Google - "Andersonville" **OR** "Camp Sumter" - results? ________________

Your Turn...

Now try to create a Google search using these tips to narrow your search to less than 100 hits. Can you do it?

Write down your search string:

Name: ___________________________________________________________
